

# SCARLETT MANUAL SORTING CONVEYOR

## SMSC 8

Options include:

- Over belt magnet for removing steel
- Cans from commodities stream
- Number of work stations
- Sorting Bins

**NZ MANUFACTURED  
QUALITY &  
PERFORMANCE**

### Scarlett Manual Sorting Conveyor (Eight Station)

Customisable manual sorting conveyor. The in-feed pit allows trucks to dump directly onto the in-feed conveyor. Minimising processes and equipment. Optional steel sorting magnetic conveyor attachment.

The conveyor can be ordered at any length to suit the number of work stations required. Forklift compatible sorting bins, allowing easy manoeuvrability and transportation of recyclables ready for baling.

**Mixed recyclable commodities are elevated to the manual sorting station platform via an infeed conveyor either in ground or above ground for manually sorting into individual recyclable commodities ready for baling.**
